

## UH-60M BLACK HAWK Rotor Brake Trainer (RBT)

This trainer provides a platform for the Black Hawk maintenance trainee to train on maintenance of the UH-60M Rotor Brake System. The effort to design, develop, integrate, test, deliver and install this trainer enabled Kratos to continue to demonstrate its commitment to excellence while utilizing its extensive, in-depth knowledge of this aircraft.

The trainer consist of a Student Station, and Maintenance Platform designed to support training in the operation, and repair of the UH-60M rotor brake system.

The RBT is used to provide training of the Black Hawk Rotor Brake System to black hawk trainees allowing them to perform all critical maintenance tasks to support the UH-60M Main Rotor Brake System.

**The Student Station portion includes:**

- Tail Rotor Shaft Section 1
- Rotor Brake Master Cylinder
- Rotor Brake Accumulator
- Rotor Brake Pressure Switch
- Bleed Rotor Brake System (modified)
- Rotor Brake Assembly
